Internships and Research Programs

NASA Internship Program; Space Communications and Navigation - 2021.

- Brought together topological electromagnetism and topological fluid dynamics to develop a framework for the Vlasov equation for application in plasma physics in group collaboration.

AIM Summer School on Dynamics, Data, and the COVID-19 Pandemic - Supported by the NSF, 2020.

- Utilized a epidemic model to predict the impact that different mitigation techniques would have on the spread of COVID-19 in communities with schools.

Mathematics and Climate Research Network Summer School and Academic Year Engagement Program - Supported by the NSF and AIM, 2019.

- Worked with eight other collaborators to develop novel code that combines data reduction techniques with a particle filter algorithm to improve the utility in high dimensional models.
